Want to learn digital text analysis? Join the spring 2018 PYTHON TEXT ANALYSIS WORKGROUP!

This workgroup is designed for anyone who wants to learn digital text analysis and integrate it into their research. In the spring semester, we will alternate between instructional days and project development days.

Participants may use their own computers, or they may use loaner Macbooks made available by the Institute for Digital Research in the Humanities (IDRH). Everyone is welcome in this group; no prior programming experience is required.

When: Every other Friday at 1PM  
Instructional days: 1/19, 2/2, 2/16, 3/2, 3/16, 4/6, 4/20  
Project Development days: 1/26, 2/9, 2/23, 3/9, 4/13, 4/27  
Where: Watson 410A, the Digital Humanities Instruction Lab  
Who: The workgroup is coordinated by Jonathan P. Lamb, Assistant Professor of English and CRMDA Faculty Fellow
